Secure Browser for Windows

The Windows Secure Browser is a locked-down version of an internet browser that prohibits access to other applications during testing. This Secure Browser requires an installation that requires administrative privileges. Once installed, administrative privileges are not required to launch the Secure Browser.

Download on Windows

1. Select the **Download** button located underneath these instructions.
2. Depending on your browser settings, the Secure Browser file will download in one of the following ways:
 - The file will automatically download to the default location, typically your desktop or **Downloads** folder.
 - You will be prompted to run or save the file. Select **Save**. The file will download to the default location.
3. Double-click the **Secure Browser** icon or file name to open the Secure Browser.
4. You may receive the following Security Warning: "Do you want to run this app?" Select **Run**.
5. If the Secure Browser has not been installed previously, you will be prompted that an installation is required. Click **OK**. This installation requires administrative privileges to be granted.
